Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: Claim 1 line 7 recites the limitation "two sides of the upper end of the slide track". "the upper end" lacks antecedent basis, however the examiner understands what the applicant is claiming, the examiner suggests amending the claim to change "the" to --a--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (1,617,488).

Johnson ('488) discloses an adjustable spanner having a holding portion installed at one end of the spanner body; a retaining jaw installed at another end of the spanner body; a movable jaw installed to the retaining jaw; the movable jaw being slidable along a slide track at a head portion of the spanner body; two sides of the upper end of the slide track being formed with respective auxiliary projecting track; two lower sides of a lower edge of the movable jaw formed with respective slopes so as to enhance the

strength of the structure; the slopes being configured to be matchable to the two auxiliary projecting tracks; each auxiliary projecting track being extended from a respective upper surface of the slide track with an angle between 60 to 85 degrees so as to enhance the strength of the adjustable spanner.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Illig discloses an adjustable spanner having slopes on the slide track.
